

pStor License

Thank you for choosing pStor.

License Performance

Activation Code	8676-8e7c-8689-45cf-80d9-92e7-3772-ee48
Purchase Order:	PO22000117
Expiry Date	2099-12-31
pStor-Video Storage	300 Channels
pStor-Image Storage	NO

* The Licenses are compatible with pStor V1.5.1 and later versions.

Software Requirements and Hardware performance

- For recommended software configuration and expected performance please refer to following document: [LINK](#)

Recommendations for cybersecurity:

- Block unauthorized computers or devices to access the local network, and forbid unauthorized connection to untrusted network on rightful computers.
- In case some services must be exposed to an untrusted network, build a Demilitarized Zone (DMZ) to add an additional layer of security to the Local Area Network (LAN), so that an external attacker only has access to the services in the DMZ, rather than any device of the LAN.
- Create VLANs to divide the network into different broadcast domains, and apply strict security strategies for important VLANs.
- Use VPN for remote access, which interconnects remote, and mostly geographically separate, networks through public communication infrastructures, such as the Internet.
- Choose proper security technologies to enhance the network safety, such as intrusion detection system (IDS), ACL (Access Control List), 802.1x, RADIUS authentication and Security Auditing.
- Adopt Domain Control on Windows Server Systems, whereby computer users are granted to have a number of necessary permissions.

Attention

To ensure the proper use of your license, please subject to the following items:

- The license can be applied to activate only one Hikvision pStor at a time.
- The license should be kept in a safe place. Hikvision shall not provide replacement for any loss of the license.
- The Upgrade license can only be applied on platform of standard versions (customized versions excluded)
- **NEW:** Due to the upgrade of License system, if the version of your pStor is V1.4.0 or earlier, you need to upgrade your software following professional instructions.
